Unlock 10,000+ free n8n automations to save time, scale your workflows, and build AI-powered systems without paying for Zapier or Make.

If you're not a member but want to read this article, see this friend link [here](#).

Everyone talks about **AI tools**, but here's the truth: **automation is the real money printer**.

While most people waste hours doing repetitive tasks, a few smart founders and developers have built **10,000+ ready-to-use n8n automations** and they're giving them away **for free**.

Yes, free. Zero dollars. You just copy -> paste -> run.

And today, I'm handing you the exact treasure chest.

Why n8n?

If you're not using n8n, you're leaving insane leverage on the table.

- Open-source Zapier alternative
- Unlimited workflows
- Self-host or use cloud
- Connect 400+ apps without writing a single line of code

Think: email follow-ups, social media posting, lead scraping, SEO automation, invoice generation, AI-powered customer support, data syncing across platforms... all automated.

Now imagine doing this without paying hundreds per month to Zapier or Make.

The Goldmine of 10,000+ Free n8n Automations

Here are 4 insane resources that basically hand you pre-built automations on a silver platter:

- [n8n Free Templates Repo](#)
A massive community-driven repo with thousands of plug-and-play workflows.
- [Official n8n Workflow Library](#)
The official n8n team's collection from basic Gmail automations to advanced AI pipelines.
- [Zie619's Workflow Vault](#)
A GitHub treasure chest of unique automations (think scraping, alerts, reporting).
- [Awesome n8n Templates](#)
A curated list of the *best of the best* automations across the internet.

That's 10,000+ workflows ready for you to steal. No gatekeeping. No "\$99 Gumroad pack." Pure open-source magic.

My Secret Weapon for n8n Power Users

Here's the catch: once you start stacking automations, things can get messy.

That's why I recommend using a wrapper that makes your workflows **look cleaner, run faster, and scale better.**

Check out [AnotherWrapper](#) it's like a **booster pack for n8n**. Think of it as putting your automations on steroids.

If you're serious about running 100s of workflows without headaches, this is a no-brainer.

Final Words

Most people scroll past free resources like this.

The ones who don't? They end up with **hours of time saved every week** (and sometimes an entire business built on automations).

So yeah **steal these 10,000+ n8n automations today**. They're literally sitting there waiting for you.

Your move.

This is incredible — quick question: if I'm brand new to n8n, which of these resources would you recommend starting with first? Something beginner-friendly before I dive into the deep end?

Thanks, you are amazing. 😊 .

Also, I have a question, I'm a newbie, and I would love to see a tutorial on how to use n8n. Do you have a tutorial ?

Hi Kalash, thanks for sharing this information.

Quick question:

When you say “ready-to-use n8n automations,” do you mean we can just copy and paste the JSON?
